CAREER OBJECTIVE

ECE student with strong interest in PCB Design, Embedded Systems, and IoT Hardware Development. Skilled in schematic design, PCB layout design using Altium Designer, Arduino-based system development, and AI-based embedded applications. Seeking an opportunity to contribute to real-world hardware product development and improve practical engineering skills.

Educational Qualifications

S.No	Course	Institution	Year of Completion	Percentage /CGPA
1	B.E - ECE	Erode Sengunthar Engineering College	2026	8.08 CGPA
2	HSE	B.K.N Higher Secondary School,Nasiyanur	2022	61.66%
3	SSLC	Panchayat Union Middle School,Semboothampaalayam	2020	72.2%

TECHNICAL SKILLS

PCB Design

- Altium Designer
- Footprint Creation
- Schematic Capture
- PCB Layout Design
- Component Placement
- Routing and Design Rule Checking (DRC)
- Gerber File Generation

Embedded Systems & IoT

- Arduino
- ESP32
- Sensor Interfacing
- Embedded Hardware Prototyping
- IoT-Based Monitoring Systems

Programming Languages

- C
- Basic Python

- Java
- Basic C++

Digital Design

- Verilog HDL
- Digital Electronics
- Microprocessors and Microcontrollers

AI & Machine Learning

- YOLO Object Detection
- Dataset Preparation and Annotation
- AI Model Training

PROJECTS

Monitoring and Alert System for Cerebral Palsy Walkers Using Image Processing

- Developed an ESP32-based smart walker system with camera and sensors for monitoring posture and detecting falls.
- Implemented real-time alert functionality for caregivers during emergency situations.
- Integrated image processing and embedded hardware components for safety monitoring.

Mussels Detection Using YOLO

- Developed a YOLO-based object detection system for mussel identification using custom dataset preparation and model training.
- Worked on image annotation, testing, and detection accuracy improvement.

Design and Development of High Precision Wireless Stethoscope

- Designed an Arduino-based wireless stethoscope capable of transmitting heartbeat sounds remotely.
- Focused on improving sound clarity and wireless communication.

CERTIFICATIONS & COURSES

- NPTEL – Introduction to Industrial Internet of Things (IIoT)
- NPTEL – Digital Design with Verilog
- NPTEL – Machine Learning and Deep Learning – Fundamentals and Applications
- PCB Design Training – SSI Institution
- Fundamentals of C++
- Basics of Networking

WORKSHOPS & HACKATHONS

Workshops

- Skill Development & Entrepreneurship Training Program
- Fundamentals of Robotics
- AI for Students: Build Your Own Generative AI Model

Hackathons

- Smart India Hackathon 2024
 - AI to Glow Hackathon – VIT Bangalore
-

STRENGTHS

- Teamwork and Collaboration
 - Fast Learner
 - Problem Solving
 - Interest in Hardware Development
 - Adaptability to New Technologies
-

AREA OF INTEREST

- PCB Design
 - Embedded Systems
 - IoT Hardware Development
 - Digital Electronics
 - AI-Based Embedded Applications
-

DECLARATION

I sincerely declare that all of the above mentioned particulars in this resume is accurate to the best of my knowledge.

YOURS TRULY
